

D2/3 Wish List

- Stronger integration into d2 :
 - Web browser embedded into d2
- Developing more web services
 - More MCDA methods
 - **Web Services To be exposed** on the Ernst-Schroeder machine : please contact Raymond
- D3 Web GUI (AJAX)
 - Web GUI helps promotion
 - Multi-user/collaborative vs. personal case => standalone again ?
 - Editing pages of problems
 - No more deployment problems
- Embedded DB (more easy to install the software)
 - GoogleGears ?
 - Offline work => xml export/import ?
- A Db of cases
 - Pb description & solutions
 - Encourages contribution in the book in a standard way
- Import pb from excel
 - Maybe using standard [open]office tools to export and write transformations
- Doc for plugins
- Who is online ? Awareness ?
- Workflow
 - Will help to better understand input/output
 - June : a beta WF model ...
 - WF Examples for IRIS, RUBIS are requested
- “All methods are progressive” [Marc]
- “Cycles are bad” [Gilles]
- Dynamic config. local against remote webservices ... [Luis]
 - Install time
- Easy install [Olivier]
 - => tutorial [Raymond]
- “I promised myself to demo an asynch server call for Coimbra” [Raymond]
 - It’s on the record, Ray ;-)
- Split methods in parts then compose them

Job1 (M1 : input pb1 => output sol1)

Job 2 (M2 : sol1 as pb2 => sol2)

- Methods bricks
- D2 DB independency
