Call for Papers

Special Issue of RAIRO-Operations Research on Combinatorial Optimization

We invite submissions of novel research articles for a forthcoming issue of *RAIRO-Operations Research* on Combinatorial Optimization.

This special issue will be dedicated to the International Symposium on Combinatorial Optimization that has been held in Athenes, Greece, April 19-21, 2012. However it is also open to papers which have not been presented at the conference.

High quality research papers are solicited to address theoretical as well as practical issues of Combinatorial Optimization. Topics of interest include, but are not limited to:

> Approximation algorithms
> Cutting planes algorithms
> Polyhedral combinatorics
> Local search algorithms
> Computational complexity
> Graph and network algorithms
> Multiobjective optimization
> Linear and integer programming
> Interior point methods

The deadline for submission of full papers is September 31, 2012.

For their submissions, the authors can send their contributions to one of the Guest Editors. Electronic submissions in the form of pdf files are encouraged. All submissions will be refereed according to the high standards of the journal.
Information about RAIRO-Operations Research including author instructions is available at
http://journals.cambridge.org/images/fileUpload/documents/ROE_IFC.pdf
Additional information about the special issue can be obtained from the Guest Editors.
